

Teaching Philosophy

I believe children are our future. I believe each and every student has the right to experience the purpose of education, and the nature of learning. I will help children to develop their potential utilizing the nature of my knowledge as an educator. I will assist children in discovering who they are, so they can express their own opinions and nurture their own ideas. I have a vision to embed knowledge into our students to lead and live a healthy active lifestyle.

My goal is to provide students with a positive environment where they can learn basic motor and manipulative skills. Students will have an opportunity to express themselves through physical activity and learn social skills through interaction in a multicultural atmosphere. They will be taught the resources to become physically fit throughout life. They will have the opportunity to engage in a diverse selection of activities to unearth what they enjoy and will continue to do after graduation.
